

ABDUL RAHEEM

Technical Project Manager | Agile Delivery | Scrum Master
Lahore, Pakistan | +92 331 6693499 | pro.engrraheem@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Technical Project Manager with 7+ years delivering SaaS, web, mobile, CRM, LMS, and enterprise software for clients across the UK, Saudi Arabia, and the USA. Leads distributed Agile teams through the full SDLC with a focus on clear requirements, predictable delivery, and calm execution. Strong technical foundation in REST APIs and system design. Uses AI tools for documentation and analysis while verifying every output. Known for turning ambitious briefs into shipped software.

SKILLS

Project Management: Agile, Scrum, Kanban, SDLC, Sprint Planning, Backlog Refinement, Release Planning, Risk Management, Dependency Management, Scope Management, Stakeholder Management

Tools: Jira, Azure DevOps, Confluence, ClickUp, YouTrack, Slack, Microsoft Teams, Notion

Technical: REST APIs, System Design Fundamentals, Basic Python, Basic SQL, HTML/CSS, JavaScript

AI Productivity: ChatGPT, Claude, Microsoft Copilot, Google Gemini (documentation, requirement analysis, meeting summaries, workflow prototypes)

PROFESSIONAL EXPERIENCE

Technical Project Manager / Scrum Master

DG Cars – United Kingdom (Remote) | Aug 2025 – Present

- Lead Agile delivery for distributed engineering teams, covering sprint planning, project timelines, stakeholder communication, and delivery priorities.
- Translate business requirements into user stories and acceptance criteria; coordinate backlog refinement with developers and QA across the full SDLC.
- Own Jira boards, risks, dependencies, release planning, and delivery reporting so milestones stay visible and on track.
- Apply ChatGPT, Claude, Microsoft Copilot, and Google Gemini for documentation, meeting summaries, requirement analysis, and workflow prototypes, verifying every output before use.

Project Manager / QA Lead

BrainCell – Saudi Arabia (Remote) | May 2024 – Jul 2025

- Managed software development and QA teams across multiple client projects using Agile delivery.
- Planned sprints, tracked progress, managed release readiness, and kept business stakeholders informed at every stage.
- Improved QA processes, supported backlog refinement, and coordinated testing that raised software quality.
- Prepared documentation, sprint reports, and stakeholder updates with AI assistance while validating every output.

Project Manager

App4orce – Pakistan | Mar 2023 – Apr 2024

- Managed web, mobile, and SaaS projects end to end, coordinating developers, designers, QA engineers, and clients.
- Led sprint planning, backlog refinement, release planning, risk management, and project reporting to hold delivery schedules.
- Worked with stakeholders to define scope, prioritize features, and turn business needs into actionable development tasks.
- Created workflow mockups and lightweight prototypes with AI-assisted tools so technical discussions started from something concrete.

Project Manager

Karigar Web Solutions – Pakistan | Aug 2020 – Feb 2023

- Directed more than 50 international client projects covering WordPress tools, mobile apps, Chrome extensions, and AI applications.
- Managed a cross-functional team of 20 developers, designers, and QA engineers and finished 95% of projects on schedule.
- Introduced structured Agile Scrum workflows that replaced legacy habits with a predictable release cycle.
- Handled planning, client communication, requirement gathering, documentation, task tracking, and delivery monitoring.
- Received the Best Performance Certificate for delivering complex client solutions under compressed timelines.

Project Manager

TechnoSofts – Pakistan | Jan 2020 – Jul 2020

- Managed WordPress and e-commerce projects for international clients from requirement gathering through deployment.
- Coordinated developers, designers, and QA while owning schedules, milestones, and client communication.
- Ran client demonstrations, managed feedback, and ensured deliverables matched business requirements.
- Delivered more than 10 custom web solutions on time without compromising quality.

QA Engineer

HI Tech IT Company – Pakistan | Jan 2019 – Dec 2019

- Executed manual testing, prepared test cases, documented defects, and validated fixes across the software development lifecycle.
- Worked with developers and project managers to raise software quality and support clean releases.

SELECTED PROJECTS

Learning Management System with AI Chatbot

- Managed end-to-end delivery of an LMS platform with online courses, attendance, assessments, live classes, and an AI-powered chatbot. Validated requirements before development, then coordinated stakeholders, engineering, testing, and production releases.

AI Marketplace Scraper Platform

- Led planning and delivery of an automated platform that collects real-time product data from multiple e-commerce sites. Kept engineering and stakeholders aligned and validated each collection workflow before it went live.

Rental SaaS Dashboard

- Coordinated development of a SaaS dashboard for customer retention, subscription management, and operational reporting. Prioritized features with stakeholders and steered each release through user acceptance testing.

EDUCATION

Bachelor of Software Engineering | Superior University, Lahore, Pakistan | Graduated 2018

CERTIFICATIONS

- Google Project Management Professional Certificate
- Professional Scrum Master (PSM I)
- Project Management Professional (PMP) – In Progress
